The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/517,950	Applicant(s) HANCOCK, DARRAS L J	
	Examiner José V. Chen	Art Unit 3637	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 January 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 3, 4, 7, 8, 9, 11-14, 16, 19-22, 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lindstrom. The patent to Lindstrom teaches structure substantially as claimed as discussed above including guard (46) and retaining structure (47). The structure to which the guard is attached, the use of different materials, such as plastics, glass, metals, would have been obvious and well within the level of ordinary skill in the art since such structures are conventional materials and further suggested by Lindstrom. The method would have been obvious in view of the structures. It is noted that the height of the guard acts as a visual barrier to a child but not to an adult. Further, the attachment structure, such as mechanical structure, adhesives, magnets,

suction structure are all conventional connection structures readily available in any hardware store, such structures used in the same well known intended purpose.

Applicant is given official notice of such.

Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lindstrom as applied to the claims above, and further in view of Sargent. The patent to Lindstrom teaches structure substantially as claimed as discussed above including a plurality of guard members, the only difference being that the height of each is no different. However, the patent to Sargent teaches the use of providing different heights of guard members to be old. It would have been obvious and well within the level of ordinary skill in the art at the time of the invention was made to modify the structure of Lindstrom to include guard members of different heights, as taught by Sargent since such structures are used in the same intended purpose and would have been a predictable result, thereby providing structure as claimed.

Response to Arguments

Applicant's arguments filed 01/29/09 have been fully considered but they are not persuasive.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
